- ✓ Ensure end-to-end QoS with a dedicated private Cloud instances configured specifically to your enterprise!, *we are a private cloud over a public cloud!* We use Secure communications using VPN, TLS and SRTP encryption, and enjoy long-term stability with 99.999% availability on our core infrastructure. → **migrate your communication service to XLogix Platform in Minutes!!**
- ✓ XLogix platform uses a global backbone that is fully geo-redundant and each central cluster of our network is connected with automatic failover capabilities in place. → **Maintain Control of Your Call Routing**
- ✓ Enables a diverse & flexible workforce to effectively and efficiently collaborate, with the flexibility to choose a variety of XLogix Platform pre-configured packages to immediately enables features to suit their communications preferences. → **Cost effective solution with feature-rich & All in one packages!**

Business Model & Go To Market!

Three practices for SpeechLogix to cover the global market need!

Growth Strategy – BU focus

How will we scale in the future

UCC BU

UCaaS + CCaaS Business Unit

- Resellers + Partners model Direct Sales hosted in Google Cloud Platform.
- Global Voice & SMS Service.
- 100% Compliant Comms for Long-Term Stability.
- Carrier-Grade Voice Quality.
- Easy to migrate existing service to XLogix Platform.
- Cost effective solution with feature-rich & All-in-one packages

CSP BU

Cloud Services Providers Business Unit

- White label for Cloud Services Providers
- Attractive Revenue Share Model with minimum upfront investment.
- Help CSPs to effectively launch competitive UCaaS solutions.
- Launch with CSP's branded telephony apps.
- Higher margins for CSPs, not a simple internet pipe anymore.

OPS BU

Network On-Premise Business Unit

- On-Premise business for legacy customers.
- XLogix platform is compatible with 30+ On-Premise PBXs and platforms
- Future proof investments for legacy customers with long term development cycles and feature rich platform.
- Easy to migrate to cloud.
